Hybrid Neural Network and Expert Systems

Larry R. Medsker

Hybrid Neural Network and Expert Systems Larry R. Medsker
Hybrid Neural Network and Expert Systems presents the basics of expert systems and neural networks, and the important characteristics relevant to the integration of these two technologies. Through case studies of actual working systems, the author demonstrates the use of these hybrid systems in practical situations. Guidelines and models are described to help those who want to develop their own hybrid systems.
Neural networks and expert systems together represent two major aspects of human intelligence and therefore are appropriate for integration. Neural networks represent the visual, pattern-recognition types of intelligence, while expert systems represent the logical, reasoning processes. Together, these technologies allow applications to be developed that are more powerful than when each technique is used individually.
Hybrid Neural Network and Expert Systems provides frameworks for understanding how the combination of neural networks and expert systems can produce useful hybrid systems, and illustrates the issues and opportunities in this dynamic field.

From reader reviews:

Gina Hill:

In other case, little people like to read book Hybrid Neural Network and Expert Systems. You can choose the best book if you love reading a book. Provided that we know about how is important any book Hybrid Neural Network and Expert Systems. You can add expertise and of course you can around the world by just a book. Absolutely right, simply because from book you can realize everything! From your country right up until foreign or abroad you will end up known. About simple factor until wonderful thing you can know that. In this era, you can open a book or searching by internet device. It is called e-book. You should use it when you feel uninterested to go to the library. Let's go through.

John Richey:

As people who live in often the modest era should be up-date about what going on or info even knowledge to make these keep up with the era that is always change and move ahead. Some of you maybe will update themselves by reading books. It is a good choice in your case but the problems coming to anyone is you don't know what type you should start with. This Hybrid Neural Network and Expert Systems is our recommendation to make you keep up with the world. Why, since this book serves what you want and need in this era.

Dana Gallo:

Is it an individual who having spare time and then spend it whole day by means of watching television programs or just lying on the bed? Do you need something totally new? This Hybrid Neural Network and Expert Systems can be the answer, oh how comes? A fresh book you know. You are so out of date, spending your extra time by reading in this brand new era is common not a geek activity. So what these ebooks have than the others?

Audrey Rivas:

That book can make you to feel relax. This particular book Hybrid Neural Network and Expert Systems was colourful and of course has pictures around. As we know that book Hybrid Neural Network and Expert Systems has many kinds or type. Start from kids until young adults. For example Naruto or Private investigator Conan you can read and believe that you are the character on there. So , not at all of book usually are make you bored, any it offers up you feel happy, fun and rest. Try to choose the best book for you personally and try to like reading that.
