The Theory and History of Ocean Boundary-Making

Douglas M. Johnston

The Theory and History of Ocean Boundary-Making Douglas M. Johnston

In this book Douglas Johnston provides a synthesis of all disciplines relevant to any aspect of boundary-making. He outlines the general theory of boundary-making, reviews the modern history of all modes of boundary-making in the ocean, and provides a theoretical framework for the analysis and evaluation of ocean boundary claims, practices, arrangements, and settlements. The author suggests that as bilateral treaty-making continues, significant boundary delimitation patterns will emerge, some of which may prove useful in non-oceanic contexts of boundary-making and natural resource management such as Antarctica, airspace and outerspace, and international lakes and rivers.
