Videostrobic Examination Of The Larynx

Minoru Hirano, Diane Bless

Videostrobic Examination Of The Larynx Minoru Hirano, Diane Bless

Written in a straightforward style reflecting the authors' extensive teaching and clinical experience in the field, this clinical reference book was developed for practitioners utilizing videostroboscopy in the evaluation of vocal disorders due to laryngeal pathologies. The opening part of the book, in which stroboscopy is introduced and a detailed description of vocal fold vibration is provided, will enable readers to comprehend the visual data that is elicited by videostroboscopy. In later chapters, clinical procedures, protocols, administration guidelines and interpretation are covered in detail. One of the highlights of the book is the chapter featuring the most common laryngeal pathologies, their acoustic characteristics and vibratory patterns as seen in videoprints. The book's numerous clinical forms and extensive references make it valuable both as a clinical training book and professional source of reference.
