## Transactions of the Eighth Prague Conference: on Information Theory, Statistical Decision Functions, Random Processes held at Prague, from August 28 ... the Prague Conferences on Information Theory)

During the past Prague Conferences, the Organizing Committee had to face with a great regret permanent and even increasing delays in publishing the Transactions. The delays seemed to be out of any our reach as long as the traditional manuscript delivery rules and traditional printing technique were supposed to be employed. This is why we decided, starting with this Conference, for a new method of papers collection and printing. We want to thank all participants of our conference, in particular those who contributed to the volumes A and B, for understanding this our step. Our thanks are due to Academician Jaroslav Koieinik, the scientific editor of these volumes, and to the editorial board for reviewing all papers and fulfilling many printing management duties. We also thank Academia Publishing House for printing the whole volume in time. ORGANIZING COMMITTEE of the EIGHTH PRAGUE CONFERENCE on INFORMATION THEORY, STATISTICAL DECISION FUNCTIONS, RANDOM PROCESSES PROBLEMES LIES A LA DETERMINATION DES SPECTRES DE PUISSANCE EN THEORIE DES FONCTIONS ALEATOIRES A. Blanc-Lapierre Gif-sur-Yvette (France) La détermination expérimentale du spectre de puissance, au sens physique, d'une grandeur fluctuante pose des problèmes d'analyse spectrale et d'ergodisme. Ces deux types de problèmes sont examinés conjointement pour une grandeur représentée par une fonction aléatoire  $X(t)$ , pas nécessairement stationnaire, mais présentant des caractères de permanence suffisants pour que la puissance moyenne puisse être définie.
