## Universities, the Citizen Scholar and the Future of Higher Education (Palgrave Critical University Studies)

The future of higher education is in question as universities struggle to remain relevant to the present and future needs of society. The context in which learning occurs is rapidly changing and those engaged and interested in the place and position of university education need to figure out to adapt. This book embodies a vision for higher education where graduate attributes and proficiencies are at the core of the academic project, where degree programs move beyond disciplinary content and where students are encouraged to be Citizen Scholars. Through a series of cross-disciplinary and contextual cases, the contributors to this book articulate how this vision can be achieved in our pedagogical environments, future proofing higher education.
