PCR/RT- PCR in situ: Light and Electron Microscopy (Methods in Visualization)

Gerard Morel, Mireille Raccurt

PCR/RT- PCR in situ: Light and Electron Microscopy (Methods in Visualization) Gerard Morel, Mireille Raccurt

Although the polymerase chain reaction has revolutionized genetic analysis by amplifying rare nucleic acid sequences, the in situ application is the only method that allows the localization of amplified signal within tissue structure. The applications of in situ polymerase chain reaction have greatly enhanced the field of investigation in many disciplines, including viral infections, gene modification, tumor diagnosis, gene therapy, and cellular distribution of rare mRNA copies.

PCR/RT-PCR in situ: Light and Electron Microscopy covers methods of in situ polymerase chain reaction (PCR) and reverse transcription PCR (RT-PCR), two new approaches in visualizing very low amounts of DNA and RNA in tissues and cell cultures at the light and electron microscopy levels. Written by experts in this field, the book provides theoretical consideration, as well as practical approaches to in situ PCR. The authors provide detailed protocols for each step, including the preparation of tissue samples, the rationale for the design of primers and revelation. They also emphasize the need for appropriate controls to meet the requirements of in situ PCR and RT-PCR specificity. Organized in a user-friendly two-column format, this book will provide you with tools necessary to perform and optimize these sensitive and powerful techniques in your research protocols.

From reader reviews:

Fabiola Stewart:

Do you have favorite book? For those who have, what is your favorite's book? Guide is very important thing for us to find out everything in the world. Each e-book has different aim or goal; it means that e-book has different type. Some people experience enjoy to spend their time for you to read a book. They are really reading whatever they get because their hobby will be reading a book. Why not the person who don't like studying a book? Sometime, man feel need book if they found difficult problem as well as exercise. Well, probably you should have this PCR/RT- PCR in situ: Light and Electron Microscopy (Methods in Visualization).

Melissa Peterson:

Reading a e-book tends to be new life style in this particular era globalization. With examining you can get a lot of information that may give you benefit in your life. Having book everyone in this world can share their idea. Ebooks can also inspire a lot of people. A great deal of author can inspire their own reader with their story as well as their experience. Not only the storyplot that share in the textbooks. But also they write about the data about something that you need illustration. How to get the good score toefl, or how to teach children, there are many kinds of book that you can get now. The authors on this planet always try to improve their expertise in writing, they also doing some research before they write for their book. One of them is this PCR/RT- PCR in situ: Light and Electron Microscopy (Methods in Visualization).

Jerry Thomas:

People live in this new time of lifestyle always try and and must have the free time or they will get great deal of stress from both everyday life and work. So , if we ask do people have extra time, we will say absolutely without a doubt. People is human not really a huge robot. Then we request again, what kind of activity are you experiencing when the spare time coming to a person of course your answer will unlimited right. Then do you ever try this one, reading books. It can be your alternative throughout spending your spare time, the book you have read will be PCR/RT- PCR in situ: Light and Electron Microscopy (Methods in Visualization).

Tessa Krieger:

Reading a reserve make you to get more knowledge from it. You can take knowledge and information originating from a book. Book is written or printed or outlined from each source that filled update of news. Within this modern era like today, many ways to get information are available for you actually. From media social including newspaper, magazines, science guide, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Are you ready to spend your spare time to spread out your book? Or just in search of the PCR/RT- PCR in situ: Light and Electron Microscopy (Methods in Visualization) when you desired it?
