New scientific findings from around the world demonstrate honey heals chronic wounds, beats antibiotic-resistant superbugs, eliminates tissue scarring, reduces brain damage, improves memory and minimizes the harmful side-effects of cancer treatments. An easily assimilated antioxidant, honey proves more effective than over-the-counter cough medicines, acts as a natural laxative, stimulates good intestinal flora, and alleviates spring allergies. This ancient remedy has recently been rediscovered by the medical community. As conventional therapies increasingly failed to clear infected wounds, doctors started applying honey dressings with astounding success. Chronic wounds that refused to mend for many years using standard medical care costing over \$300,000 suddenly started healing when treated with honey. In 2007, the FDA approved medical honey for diabetic foot ulcers, leg ulcers, pressure ulcers, 1st and 2nd degree burns, donor sites, traumatic wounds and surgical wounds. Two Million Blossoms lets you discover the remarkable healing properties of honey.
