Nursing Acutely Ill Adults Philip Woodrow

This comprehensive and clinically-focused textbook is designed for student and qualified nurses concerned with caring effectively for deteriorating and acutely ill adults outside of specialist intensive care units.

Divided into six sections, the book begins with chapters on assessment and the deteriorating patient, including monitoring vital signs and interpreting blood results. This is followed by two sections focusing on breathing and cardiovascular problems respectively. Section 4 explores issues around disability and impairment, including chapters on neurology, pain management, psychological needs and thermoregulation. The penultimate section looks at maintaining the internal environment, with chapters on issues such as nutrition, fluid management and infection control. The text ends with a discussion of legal issues and accountability.

Nursing Acutely Ill Adults includes a full range of pedagogical features, including sections: identifying fundamental knowledge; highlighting implications for practice; giving further reading and resources; using case scenarios to help readers relate theory to practice; and providing 'time out' exercises. It is the ideal textbook for students taking modules in caring for critically ill adults and qualified nurses working with these patients.
