Fields Medallists' Lectures (World Scientific Series in 20th Century Mathematics)

Michael Francis Atiyah, Daniel Iagolnitzer

Fields Medallists' Lectures (World Scientific Series in 20th Century Mathematics) Michael Francis Atiyah, Daniel Iagolnitzer

Although the Fields medal does not have the same public recognition as the Nobel prizes, they share a similar intellectual standing. It is restricted to one field - that of mathematics - and an age limit of 40 has become an accepted tradition. Mathematics has in the main been interpreted as pure mathematics, and this is not so unreasonable since major contributions in some applied areas can (and have been) recognized with Nobel prizes. The restriction to 40 years is of marginal significance, since most mathematicians have made their mark long before this age. A list of Fields medallists and their contributions provide an overview of mathematics over the past 60 years. It highlights the areas in which, at various times, greatest progress has been made. This CD-ROM does not pretend to be comprehensive, nor is it an historical document. On the other hand, it presents contributions from 22 Fields medallists and so provides a highly interesting and varied picture. The contributions themselves represent the choice of the individual medallists. In some cases the articles relate directly to the work for which the Fields medals were awarded. In other cases new articles have been produced which relate to more current interests of the medallists. This indicates that while Fields medallists must be under 40 at the time of the award, their mathematical development goes well past this age. In fact the age limit of 40 was chosen so that young mathematicians would be encouraged in their future work.

From reader reviews:

Ronald Moffatt:

Book is usually written, printed, or outlined for everything. You can realize everything you want by a publication. Book has a different type. As it is known to us that book is important thing to bring us around the world. Close to that you can your reading skill was fluently. A book Fields Medallists' Lectures (World Scientific Series in 20th Century Mathematics) will make you to possibly be smarter. You can feel considerably more confidence if you can know about every thing. But some of you think in which open or reading any book make you bored. It's not make you fun. Why they are often thought like that? Have you in search of best book or ideal book with you?

Christopher Henricks:

This Fields Medallists' Lectures (World Scientific Series in 20th Century Mathematics) book is simply not ordinary book, you have it then the world is in your hands. The benefit you get by reading this book is information inside this book incredible fresh, you will get data which is getting deeper anyone read a lot of information you will get. That Fields Medallists' Lectures (World Scientific Series in 20th Century Mathematics) without we realize teach the one who studying it become critical in thinking and analyzing. Don't end up being worry Fields Medallists' Lectures (World Scientific Series in 20th Century Mathematics) can bring when you are and not make your bag space or bookshelves' come to be full because you can have it in the lovely laptop even phone. This Fields Medallists' Lectures (World Scientific Series in 20th Century Mathematics) having good arrangement in word and also layout, so you will not truly feel uninterested in reading.

Elizabeth Talbot:

In this time globalization it is important to someone to get information. The information will make professionals understand the condition of the world. The health of the world makes the information quicker to share. You can find a lot of references to get information example: internet, paper, book, and soon. You will see that now, a lot of publisher that will print many kinds of book. Typically the book that recommended to you is Fields Medallists' Lectures (World Scientific Series in 20th Century Mathematics) this guide consist a lot of the information from the condition of this world now. This specific book was represented how can the world has grown up. The dialect styles that writer value to explain it is easy to understand. Typically the writer made some investigation when he makes this book. Here is why this book ideal all of you.

Millard Lopez:

Many people spending their time frame by playing outside using friends, fun activity with family or just watching TV the whole day. You can have new activity to pay your whole day by looking at a book. Ugh, do you think reading a book can really hard because you have to take the book everywhere? It all right you can

have the e-book, having everywhere you want in your Smart phone. Like Fields Medallists' Lectures (World Scientific Series in 20th Century Mathematics) which is finding the e-book version. So , why not try out this book? Let's view.
