Security in Wireless Ad Hoc and Sensor Networks

Erdal Cayirci, Chunming Rong

Security in Wireless Ad Hoc and Sensor Networks Erdal Cayirci, Chunming Rong

This book provides an in-depth guide to security in wireless ad hoc and sensor networks

Security in Wireless Ad Hoc and Sensor Networks introduces the reader to the fundamentals and key issues related to wireless ad hoc networking, with an emphasis on security. It discusses the security attacks and counter measures in wireless ad hoc, sensor and mesh networks, and briefly presents the standards on related topics. The authors offer a clear exposition of various challenges and solutions in this field including bootstrapping, key distribution and exchange, authentication issues, privacy, anonymity and tamper resilience.

Key Features:

- Introduces the fundamentals and key issues of the new technologies followed by comprehensive presentation on security attacks and counter measures
- Covers Denial of Service (DoS) attacks, hardware aspects of secure wireless ad hoc and sensor networks and secure routing
- Contains information on cryptographic primitives and electronic warfare
- Includes problems at the end of each chapter to enhance learning.

This book is well suited for graduate students in computer, electrical and communications engineering and computer science departments, researchers in academia and industry, as well as C4I engineers and officers in the military. Wireless network designers for internet service providers and mobile communications operators will also find this book very useful.

From reader reviews:

James Oliver:

Why don't make it to be your habit? Right now, try to prepare your time to do the important behave, like looking for your favorite reserve and reading a e-book. Beside you can solve your problem; you can add your knowledge by the e-book entitled Security in Wireless Ad Hoc and Sensor Networks. Try to the actual book Security in Wireless Ad Hoc and Sensor Networks as your close friend. It means that it can being your friend when you experience alone and beside that of course make you smarter than before. Yeah, it is very fortunated for you. The book makes you far more confidence because you can know everything by the book. So , we need to make new experience in addition to knowledge with this book.

Jaime Howell:

Have you spare time to get a day? What do you do when you have a lot more or little spare time? Yep, you can choose the suitable activity to get spend your time. Any person spent their particular spare time to take a wander, shopping, or went to the actual Mall. How about open or maybe read a book entitled Security in Wireless Ad Hoc and Sensor Networks? Maybe it is to be best activity for you. You already know beside you can spend your time using your favorite's book, you can wiser than before. Do you agree with it has the opinion or you have additional opinion?

Jeffrey Cooks:

On this era which is the greater man or who has ability in doing something more are more precious than other. Do you want to become among it? It is just simple approach to have that. What you need to do is just spending your time not very much but quite enough to enjoy a look at some books. On the list of books in the top record in your reading list is actually Security in Wireless Ad Hoc and Sensor Networks. This book which can be qualified as The Hungry Inclines can get you closer in turning into precious person. By looking right up and review this e-book you can get many advantages.

Catherine Cote:

That reserve can make you to feel relax. This kind of book Security in Wireless Ad Hoc and Sensor Networks was vibrant and of course has pictures on there. As we know that book Security in Wireless Ad Hoc and Sensor Networks has many kinds or type. Start from kids until young adults. For example Naruto or Investigation company Conan you can read and believe you are the character on there. Therefore not at all of book are make you bored, any it makes you feel happy, fun and unwind. Try to choose the best book for you and try to like reading in which.
