Answers to Science Questions From the Stop Faking It! Guy (PB270X) William C. Robertson

This valuable and entertaining compendium of Bill Robertson's popular Science 101 columns, from NSTA member journal *Science and Children*, proves you don't have to be a science geek to understand basic scientific concepts. The author of the best-selling *Stop Faking It!* series explains everything from quarks to photosynthesis, telescopes to the expanding universe, and atomic clocks to curveballs all with his trademark wit and irreverence. The 33 short columns, plus a new introduction, provide an introductory science course of sorts, covering topics in life science, Earth and space science, physical science, technology, and more perfect for K-8 teachers, homeschoolers, or parents who just want to boost their science know-how. Easily understood prose and lively illustrations by cartoonist Brian Diskin make this volume an engaging and, more important, readable course you can pass with flying colors.
