Partition of Cell Particles and Macromolecules

Per-Ake Albertsson

Partition of Cell Particles and Macromolecules Per-Ake Albertsson

Describes partition techniques for the separation and purification of cells, cell organelles, membrane vesicles, viruses, and biopolymers, such as proteins and nucleic acids. The basic theory of partition is discussed, as are the properties of aqueous, two-phase systems and the general behavior of particles and molecules. Updates include advances and new applications introduced since 1971.
